Not applicable	Miscellaneous Industrial Activities Designated by the Executive Director

The need for a permit, and the eligibility for coverage under this general permit, is determined either by a facility's primary SIC code or by an Industrial Activity Code that is described in this general permit. This general permit includes four Industrial Activity Codes: HZ (Hazardous Waste), LF (Landfills), SE (Steam Electric Power Generation), and TW (Treatment Works). Sectors of industrial activity are divided into sub-sectors and further defined by SIC codes in Part V of this general permit.

Operators of facilities with a primary SIC code that is included in Part V of this general permit must obtain authorization for discharges of storm water associated with industrial activity and are eligible for coverage under this general TPDES permit. The requirements for federal facilities and military installations are further described below in Part II.A.5. of this general permit. Additionally, the operator of any facility that conducts activities described by an Industrial Activity Code that is included in Part V of this general permit; must obtain authorization for discharges of storm water associated with industrial activity and are eligible for coverage under this TPDES general permit.

Sector AD is used to provide permit coverage for facilities that are designated by the executive director as needing a permit to control pollution related to storm water discharges and that do not meet the description of an industrial activity covered by Sectors A-AC. A facility that is not otherwise listed in Part V of this general permit is not eligible to apply for coverage under AD unless directed to do so in writing by the executive director.
