Designation of Material as Confidential:

The designation of material as confidential is frequently carried to excess. The Commission has a responsibility to provide a copy of each application to other review agencies and to interested persons upon request and to safeguard confidential material from becoming public knowledge. Thus, the Commission requests that the applicant (1) be prudent in the designation of material as confidential and (2) submit this material only when it might be essential to the staff in their development of a recommendation.

The Commission suggests that the applicant **Not** submit confidential information as part of the registration application. However, if this cannot be avoided, the confidential information should be described in non-confidential terms throughout the application, and submitted as a document or binder, and conspicuously marked "**Confidential.**"

Reasons of confidentiality include the concept of trade secrecy and other related legal concepts that give a business the right to preserve confidentiality of business information to obtain or retain advantages from its right in the information. This includes exemptions from disclosure under 5 United States Code (USC) 552b(c)(4) (relating to Open Meetings), 18 USC 1905 (relating to Disclosure of Confidential Information Generally), and special rules cited in Title 40 Code of Federal Regulations (CFR) §2.305 (relating to Special rules governing certain information obtained under the Solid Waste Disposal Act, as amended.) Trade secrets and confidential information are also exempt from disclosure as public records under state law in certain circumstances under Texas Government Code §552.110 (relating to Certain Commercial Information), Texas Health and Safety Code §361.037 (relating to Access to Hazardous Waste Records), 30 TAC §1.5 (relating to Records of the Agency), and 30 TAC §305.50(a)(4)(E) (relating to Additional Requirements for an Application for a Hazardous or Industrial Solid Waste Permit and for a Post-Closure Order).

The name and address of an applicant or permittee will not be considered confidential. [30 TAC §1.5(d)(4)] Information that deals with the existence, absence or levels of contaminants in drinking water will not be considered confidential. [30 TAC §1.5(d)(5)]

If confidential information is not submitted, and this causes the application to be incomplete, the registration will not be issued, amended, or modified.
