

Memorandum

TO: Senate Bill 3 Science Advisory Committee
FROM: Dan Opdyke, Texas Parks and Wildlife Department
DATE: May 7, 2010
RE: Hydrology Update

HEFR

Recent HEFR enhancements are documented in a separate memorandum.

Still working on QA/QC, formatting, and CRWR-Trident linkage.

Would appreciate volunteers for QA/QC of new HEFR before official release.

Expected HEFR2.0 release date: ???

HEFR Workshop

Proposed Date: June 10. Conflicts with TWCA conference. No other known multi-person conflicts.

Proposed Location: Two rooms reserved: (1) LCRA Shapiro with room for 30 people, (2) LCRA Redbud with room for 50 people. Need to decide if one of these is acceptable.

Agenda: Morning general presentations and discussion (may I solicit volunteers?). Afternoon working session on your own laptop.

After date and location are inked, I will get the word out, request RSVPs, and prepare an instructions document for getting IHA, HEFR, and an example dataset installed on attendee's laptop.

Hydrologic Methods Document Rev2

I have made some progress on edits to Sections 1-4. I have begun to rewrite Section 5 (HEFR) around a different example: the Nueces River below Uvalde. I have no plans to make significant revisions to Section 6 (Conclusions).

I would like to agree to a date by which I get my new draft to the SAC for your review, revisions, comments, etc.
